Author Index Volume 132 (2001)

Atici, F.M. and **G.Sh. Guseinov,** On the existence of positive solutions for nonlinear differential equations with periodic boundary conditions 341–356

Beardon, A. and **L. Lorentzen,** Approximants of Śleszyński–Pringsheim continued fractions 467–477
Bultheel, A., L. Daruis and **P. González-Vera,** A connection between quadrature formulas on the unit circle and the interval $[-1,1]$ 1– 14

Cheng, S.S., see **Tang, X.-H.** 319–329
Cools, R. and **K.J. Kim,** Rotation invariant cubature formulas over the n-dimensional unit cube 15– 32

Dai, W. and **R. Nassar,** A compact finite-difference scheme for solving a one-dimensional heat transport equation at the microscale 431–441
Damelin, S.B., H.S. Jung and **K.H. Kwon,** Necessary conditions for weighted mean convergence of Lagrange interpolation for exponential weights 357–369
Daruis, L., see **Bultheel, A.** 1– 14
De Baets, B., H. De Meyer and **H. Naessens,** A class of rational cardinality-based similarity measures 51– 69
de Groen, P.P.N. and **G.E. Karadzhov,** Slow travelling waves on a finite interval for Burgers'-type equations 155–189
De Meyer, H., see **De Baets, B.** 51– 69
De Meyer, H., see **Ixaru, L.Gr.** 83– 93
De Meyer, H., see **Vanden Berghe, G.** 95–105
De Schepper, H., Finite element analysis of a coupling eigenvalue problem on overlapping domains 141–153

Evans, D.J., M.M. Martins and **M.E. Trigo,** The AOR iterative method for new preconditioned linear systems 461–466

Gatica, G.N. and **N. Heuer,** An expanded mixed finite element approach via a dual–dual formulation and the minimum residual method 371–385
Ghelardoni, P., G. Gheri and **M. Marletta,** Spectral corrections for Sturm–Liouville problems 443–459
Gheri, G., see **Ghelardoni, P.** 443–459
González-Vera, P., see **Bultheel, A.** 1– 14
Guseinov, G.Sh., see **Atici, F.M.** 341–356

Heuer, N., see **Gatica, G.N.** 371–385
Hristova, S.G. and **G.K. Kulev,** Quasilinearization of a boundary value problem for impulsive differential equations 399–407

Ito, K. and **J. Zou,** Identification of some source densities of the distribution type 295–308
Ixaru, L.Gr., M. Rizea, G. Vanden Berghe and **H. De Meyer,** Weights of the exponential fitting multistep algorithms for first-order ODEs 83– 93
Ixaru, L.Gr., see **Vanden Berghe, G.** 95–105

Jiang, L. and **X. Yue,** Local exponentially fitted finite element schemes for singularly perturbed convection–diffusion problems 277–293
Jung, H.S., see **Damelin, S.B.** 357–369

Karadzhov, G.E., see **de Groen, P.P.N.** 155–189
Kim, K.J., see **Cools, R.** 15– 32
Kong, L., S. Wang and **J. Wang,** Positive solution of a singular nonlinear third-order periodic boundary value problem 247–253
Kravanja, P. and **P. Verlinden,** On the zeros of $J_n(z) \pm iJ_{n+1}(z)$ and $[J_{n+1}(z)]^2 - J_n(z)J_{n+2}(z)$ 237–245
Kressner, D., see **Mastronardi, N.** 71– 81
Kulev, G.K., see **Hristova, S.G.** 399–407
Kwon, K.H., see **Damelin, S.B.** 357–369

Landau, L.J. and **N.J. Luswili,** Asymptotic expansion of a Bessel function integral using hypergeometric functions 387–397
Liakhovetski, G.V. and **R.B. Paris,** Asymptotic expansions of Laplace-type integrals. III 409–429
Liu, S.T., and **Y.Q. Liu** Oscillation theorems for second-order nonlinear partial difference equations (*Letter to the Editor*) 479–482
Liu, Y.Q., see **Liu, S.T.,** 479–482
Lorentzen, L., see **Beardon, A.** 467–477

PII: S0377-0427(01)00431-9

Lube, G., L. Müller and **F.C. Otto,** A nonoverlapping domain decomposition method for stabilized finite element approximations of the Oseen equations 211–236
Luswili, N.J., see **Landau, L.J.** 387–397

Marletta, M., see **Ghelardoni, P.** 443–459
Martins, M.M., see **Evans, D.J.** 461–466
Mastronardi, N., D. Kressner, V. Sima, P. Van Dooren and **S. Van Huffel,** A fast algorithm for subspace state-space system identification via exploitation of the displacement structure 71– 81
Michiels, W. and **D. Roose,** Sensitivity to perturbations in variable structure systems 127–140
Müller, L., see **Lube, G.** 211–236

Naessens, H., see **De Baets, B.** 51– 69
Nassar, R., see **Dai, W.** 431–441

Otto, F.C., see **Lube, G.** 211–236

Paris, R.B., see **Liakhovetski, G.V.** 409–429

Rizea, M., see **Ixaru, L.Gr.** 83– 93
Roose, D., see **Michiels, W.** 127–140

Sima, V., see **Mastronardi, N.** 71– 81
Sommeijer, B.P., see **Verwer, J.G.** 191–210

Tang, X.-H. and **S.S. Cheng,** An oscillation criterion for linear difference equations with oscillating coefficients 319–329
Trefethen, L.N., see **Wright, T.G.** 331–340
Trigo, M.E., see **Evans, D.J.** 461–466
Tsuchiya, T., Finite element analysis for parametrized nonlinear equations around turning points 255–276

Van Daele, M., see **Van Hecke, T.** 107–125
Van Dooren, P., see **Mastronardi, N.** 71– 81
Van Hecke, T. and **M. Van Daele,** High-order convergent deferred correction schemes based on parameterized Runge–Kutta–Nyström methods for second-order boundary value problems 107–125
Van Huffel, S., see **Mastronardi, N.** 71– 81
Vanden Berghe, G., see **Ixaru, L.Gr.** 83– 93
Vanden Berghe, G., L.Gr. Ixaru and **H. De Meyer,** Frequency determination and step-length control for exponentially-fitted Runge–Kutta methods 95–105
Verlinden, P., The sparse structure of high-dimensional integrands 33– 49
Verlinden, P., see **Kravanja, P.** 237–245
Verwer, J.G. and **B.P. Sommeijer,** A numerical study of mixed parabolic–gradient systems 191–210

Wang, J., see **Kong, L.** 247–253
Wang, S., see **Kong, L.** 247–253
Wang, X., Variance reduction techniques and quasi-Monte Carlo methods 309–318
Wright, T.G. and **L.N. Trefethen,** Computing Lyapunov constants for random recurrences with smooth coefficients 331–340

Yue, X., see **Jiang, L.** 277–293

Zou, J., see **Ito, K.** 295–308
